

# PINNACLE III

## PERENNIAL RYEGRASS

- Superior traffic tolerance NTEP
- Strong disease tolerance
- Excellent turf quality
- Exceptional turf density

### DESCRIPTION

A third generation Pinnacle cultivar, Pinnacle III exhibits excellent turf characteristics. Pinnacle III has a deep dark green colour, very dense tillering, high endophyte along with strong overall disease resistance.

With added strong traffic tolerance, Pinnacle III is a perfect oversowing ryegrass for high wear sports. Pinnacle III is also an excellent choice for all sports use throughout Australia and New Zealand.

### WHY PINNACLE III?

**Superior NTEP traffic tolerance performance** – Traffic tolerance leads to long hours of use.

**Superb mowing quality to handle low cricket outfield cutting height** – Provides excellent ball roll and uniform surface.

**Excellent turf quality** – When you want your turf looking its best for big televised events.

**Dark green colour** – Dark grasses look amazing when striped up.

**Exceptional density and uniformity** - Density is the number one feature of wear tolerance.

**Compact growth habit** – Grasses that grow too fast wear out quicker than compact dense varieties.

**Fine leaf texture** – Visually appealing with less leaf damage.

**Very strong overall disease resistance** – Excellent performance during disease period means less chemical use.

Pinnacle III is ideal when paired with other grasses such as RPR or Barorlando.
