

NOCULATE[®] COMPLETE

17-1-14

BIOLOGICALLY BOOSTED GREENS GRADE FERTILISER

APPLICATION RATE

For use on greens, tees and other turf areas.

Rates will vary depending on turf type and climate conditions. Use higher rates when turf nutrient requirements are high.

GENERAL RATE

Apply 2-4 kg per 100m² and repeat as necessary. Irrigate after application.

Avoid applying to moist or wet turf. If unavoidable, water immediately after application to avoid spotting.

Note: This product has a balanced Nitrogen : Potassium ratio and will promote leaf growth at a steady and consistent rate. It should be used to maintain established high quality turf. The bacterial activity of this product may temporarily reduce available Nitrogen levels temporarily limiting growth if used in Nitrogen deficient situations.

ANALYSIS

6.2%	Nitrogen (N) as Urea	1.3%	PHOSPHORUS (P) as Water Soluble
5.7%	Nitrogen (N) as Ammonium	14.1%	POTASSIUM (K) as Sulphate
5.1%	Nitrogen (N) as Methylene Urea	2.0%	IRON (Fe) as Sucrate
17.0%	TOTAL NITROGEN (N) (30% of total Nitrogen is slowly available)	1.0%	MANGANESE (Mn) as Sucrate
		0.5%	CALCIUM (C) as Sulphate
		11.3%	SULPHUR (S) as Sulphate

Also contains: 1% Humic Acid, Generation Soil Wetting Agent, and Beneficial Microbes from Noculate Microbial Supplement.
