

NOCULATE[®] XN

24-0.5-5 + Fe
BIOLOGICALLY BOOSTED GREENS GRADE FERTILISER

APPLICATION RATE

For use on greens, tees and other turf areas.

Rates will vary depending on turf type and climate conditions. Use higher rates when turf nutrient requirements are high.

GENERAL RATE

Apply 1.5-3 kg per 100m² and repeat as necessary. Irrigate immediately after application.

RENOVATION

Apply 2.5 kg per 100m². Rub or hand hose into scarifying grooves and core holes. Irrigate immediately after application.

Avoid applying to moist or wet turf.

Note: This product contains a high component of readily available Nitrogen and is only suitable for turf which is actively growing and has a high Nitrogen requirement. Use on turf which is drought stressed or water logged and use during unfavourable climatic conditions may cause turf grass discolouration.

ANALYSIS

18.7% Nitrogen (N) as Urea	0.5% TOTAL PHOSPHORUS (P) as Water Soluble
2.5% Nitrogen (N) as Ammonium	5.0% POTASSIUM (K) as Sulphate
3.8% Nitrogen (N) as Methylene Urea	1.0% IRON (Fe) as Sucrate
24.0% TOTAL NITROGEN (N) (15.8% of total Nitrogen is slowly available)	3.0% CALCIUM (C) as Sulphate
	6.7% SULPHUR (S) as Sulphate

Also contains: 6% Humic Acid, Generation Soil Wetting Agent, and Beneficial Microbes from Noculate Microbial Supplement.
