WARNING — 17 to 50kg

AmendMAX Gypsum Mini is a highly concentrated, water–dispersive gypsum amendment suitable for use on fine cut turf such as golf and bowling greens, either at renovation or throughout the year in a maintenance program. Excellent for displacing sodium and correcting calcium deficiencies in soils.

Application Guide	Storage & Disposal
Maintenance Rate: 2–4kg / 100m² or 200–400kg / Ha Renovation Rate: 5–10kg / 100m² or 400–1000kg / Ha	
For best results, apply the product to a dry leaf, and then irrigate following application to disperse the granules and move them into the soil profile to initiate the amendment process. To achieve the best results, apply using a calibrated fertiliser spreader. For more information on spreader settings, discuss with your sales representative.	Reseal partially used bags, and store all bags in a dry, well-ventilated area. If the product becomes wet, the granular nature of the product will be compromised.
