Rohan

Perennial ryegrass

Rohan spreading perennial ryegrass (Rohan SPR) is a unique perennial ryegrass that has the ability to spread, repair and improve track performance. Independent trials conducted by Racing Victoria have shown Rohan SPR's superior density and root structure has led to the highest 'going stick' readings. Through using Rohan SPR you will see a reduction in divoting, along with good disease resistance and reduced leaf tip shred. Rohan SPR can help lessen track maintenance and improve your track presentation for peace of mind for race day or televised events.

Key features:

- **Less divoting** – Racing Victoria trials showed Rohan SPR (and RPR) were a stand out for divoting resistance. This leads to significantly better track performance when compared to other cultivars.
- **Excellent root growth and structure** – Rohan SPR had the highest 'going stick' reading in RV trials. Greater root development means better track race performance especially in wet weather.
- **Late seed head protection** – Helps improve track performance in spring as Rohan SPR stays leafier longer than other varieties.
- **Excellent rust resistance** – Leads to better track aesthetics.

It is the regenerating ability of RPR that separates it from traditional perennial ryegrasses. RPR plants develop pseudo-stolons, which allow them to regenerate in all compass directions post-race. It has superior wear tolerance and has proven to withstand divoting and repairs itself. RPR is dark green, with dense fine tillering that makes your track not only wear better but visually is very appealing.

Key features:

- **Density and superior horse traffic tolerance** – reduced divoting and improved track performance with reduced labour for divoting.
- **Determinant stolons** – patented stolon technology that can do things other grasses cannot.
- **Colour and cutability** – dark green colour and clean cutting ability of RPR is very appealing for both racegoers and TV events.

Proven reduced divoting in rv trials!

"Rohan had fantastic root structure all year round and no doubt would race well. If we were looking for just root structure this would be the pick and spreading was evident."

Sam Tankard – Moonee Valley

Trial results

Varieties	Colour	Spring root structure	Winter growth	Winter root structure	Germi-nation/early growth	Overall
Bealey	10/10	8.5/10	10/10	7/10	7/10	9/10
RPR®	10/10	10/10	5/10	8.5/10	7/10	8.5/10
Rohan	6/10	8.5/10	6.5/10	8.5/10	6/10	7/10
Jetta	8.5/10	8/10	6/10	6/10	5/10	7/10
Matilda	6/10	8/10	7/10	6.5/10	6.5/10	6.5/10
Pharlap	7/10	7/10	6/10	6/10	5/10	5.5/10

Striker

Top track annual

Striker Top Track Annual is a blend of two annual ryegrasses, Vortex and Arnie – specifically designed for Kikuyu racetrack oversowing.

Arnie

Perennial ryegrass

Why Arnie?

- Arnie is a diploid annual ryegrass selected for strong early growth, good spring growth and rust resistance.
- It is densely tillered with fine leaves and an upright growth habit. Due to its high tiller density, Arnie is well suited to oversowing Kikuyu racetracks for winter wear.
- Arnie has undergone more than six years of evaluation in Australia and has proven to be a highly adaptable variety.
- Being diploid also means Arnie's blades are not as slippery as glossy Tetila types allowing for better track footing and performance.

Featured benefits

- Australian bred by Barenbrug – giving excellent adaptation
- Fast out of the ground giving your track quick results before winter
- Excellent growth in autumn/winter/spring – providing maximum recovery and track presentation
- Good heat tolerance giving you peace of mind during warm periods
- Good rust resistance aiding in less unsightly rust spores that reduce track aesthetics.

Vortex

Perennial ryegrass

Why Vortex?

- Vortex is the new and improved replacement for T-Rex.
- Australian bred by Barenbrug, this grass offers excellent adaptation over a range of environments.
- Vortex is a fast establishing annual ryegrass with good recovery over the winter period. Selected for rust resistance and heat tolerance, Vortex is an ideal choice for oversowing warm season species such as Kikuyu racetracks.
