

Technical Information Sheet

BIG FOOT BLUE

Blue spray indicator dye

Active ingredients 93g/L sulphonated aromatic dye

Pack size 5L, 20L, 200L

Big Foot Blue is a highly concentrated blue indicator dye for use with pesticides and fertilisers in agricultural, turf and urban situations. Suitable for use with all water based spray mixtures, it clearly indicates where the spray has gone.

Big Foot Blue is non-staining and can be washed off skin and equipment. It will dissipate from sprayed areas with sunlight or water.

Big Foot Blue can be used for colour enhancement of turf. The rate can be varied to achieve the desired result.

Key benefits of Bigfoot

- Ideal spray dye marker for spray solutions to clearly identify already sprayed areas
- Can be mixed with most herbicides, fungicides, insecticides and fertilisers
- Saves chemical usage by minimising spray overlap and respraying previously treated areas
- Can be used for colour enhancement to turf in dry situations

Directions for use

Big Foot Blue is only suitable for mixing with water based spray solutions. Following mixing instructions on the label of the pesticide or fertiliser product and unless indicated differently add Big Foot Blue last to the full spray tank.

This product may discolour masonry, brick and concrete areas. Avoid applying to these areas and wash any affected area before product dries.

Application Rate Table

Situation	Rate	Comments
Boom spraying	100-150mL/100L of spray solution	Suitable for use with all water based spray mixtures. Vary rate depending on foliage colour and height.
Hand sprayers and knapsacks	10-15mL/10L of spray solution	
Colour enhancement of turf	6-10mL/100m ² in a convenient volume of water	Use the higher rate for a deeper colour.
