

APPLICATION GUIDE

Apply at the rate of 2.5kg/100m² or 250kg/ha.

Apply to dry foliage on medium to low cut turf surfaces such as sportsfields, golf fairways, tees, surrounds, and general amenity areas. **DO NOT** use on golf greens or bowling greens. Water within 6-hours of application with at least 6mm of water. Iron can stain some surfaces, sweep off hard surfaces such as concrete to avoid staining, do not wash off. **DO NOT** apply when temperature exceeds 28°C.

SPREADER SETTINGS GUIDE

SPREADERS	GROUND SPEED	WIDTH OF COVERAGE	PRODUCT RATE	SPREADER SETTINGS
AccuPro 2000	5km/hr	3m	2.5kg/100m ²	K1/2
Model SR 2000				K1/2
Lesco				# 19

Spreader settings are a guide only, all spreaders should be calibrated before use.

WARNING

DO NOT swallow. The dust from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin. This fertiliser contains biuret. This fertiliser is for soil application only. **DO NOT** use in foliar sprays.

STORAGE AND USE

IMPORTANT INFORMATION

- Always water fertiliser in well, immediately after application. Watering should involve a thorough saturation of the area.
- Avoid direct contact with plant roots, seeds etc.
- Even, light and regular applications of a quality product will achieve best results.
- Always reseal bags after use and dispose of empty bags properly.
- Sandy soils will require lower rates of fertiliser but more frequent applications.
- Apply sparingly on potted plants as excessive fertiliser can cause burning relatively easily.
- It is much safer to apply small amounts on a regular basis.
- Do not exceed recommended application rates as this can be harmful to plants.
