GENERAL INSTRUCTIONS:

Driftex has been formulated with the optimum level of refined canola oil and activator surfactants to achieve enhanced rainfastness, deposition, penetration and improved efficacy with many pesticides when applied to the foliage or turf.

When delivered through a hydraulic spray unit, Driftex will provide a narrow droplet spectra around 100 micron for maximum efficacy with minimum losses due to drift.

DIRECTIONS FOR USE:

Situation	Knapsack	per 100 L
Drift reduction of pesticide spray	2.5 - 5ml/L	250ml-500 mL
Improved rainfastness and pesticide deposition	10ml/L	1 L

The rate of Driftex is directly related to the water volume, not the size of the treated area.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

MIXING

Half fill spray tank with water and all other ingredients under agitation. Add required amount of Driftex. Top up tank with water and continue agitation until all ingredients are fully dispersed. Pre-mixing with the pesticide is not required.

COMPATIBILITY:

Driftex is compatible with a wide range of pesticides and will enhance efficacy to a varying degree depending on the particular pesticide class.

CROP SAFETY:

Always check the pesticide label before addition of Driftex. As there are a wide range of potential combinations, test by application to a small trial area before undertaking full scale spray, for safety on non target plant species. At high rates, particular care must be taken when used with Illoxan selective herbicide (Illoxan is a registered trademark of Aventis Pty Ltd).

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT.

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL:

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a well ventilated area, as cool as possible. Do not store for prolonged periods in direct sunlight.

Triple or, preferably, pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site.

Break, crush, puncture and bury empty containers in a local authority landfill. If not available bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

CONDITIONS OF SALE:

The use of Driftex is beyond the control of the manufacturer and no warranty expressed or implied is given by SST Products regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and SST Products accepts no responsibility for any consequences whatsoever resulting from the use of this product.
