

Defend your turf with Reserve Stressgard Fungicide

Disease Control + Stress Management + Plant Health

Reserve® Stressgard Turf Fungicide is a contact and protectant fungicide for the control of fungal diseases in turf. With the added benefit of Stressgard® Formulation Technology, Reserve Stressgard unlocks the full potential of a disease management program with Envu's portfolio of fungicides containing Stressgard® Formulation Technology.

Diseases Controlled

Dollar Spot, Brown Patch, Gray Leaf Spot

Areas of Use

Golf greens, Bowling greens, Turf and Lawns

KEY FEATURES

Innovative and premium Chlorothalonil formulation

Effective control of key turf diseases

Contains Stressgard Formulation Technology

Enhances turf health benefits

Excellent tank mix compatibility

Low risk of resistance development

The science behind Stressgard technology

Stressgard® is an advanced formulation technology from Envu, proven in independent research to mitigate stress and deliver consistent turf quality for a better playing experience.

Stressgard isn't just one product, but a whole portfolio that gives you flexibility and versatility to deliver consistent, high quality playing surfaces under any conditions.

Envu Stressgard fungicides enhance plant processes such as photosynthesis and chlorophyll production. They work on the outside and inside of the plant to protect turf from fungal attack, heat, drought, shade, traffic and excess solar radiation, so you can play on, no matter what.

The Treatment

A prescribed Stressgard solution is applied to prevent or address biotic and abiotic stresses.

Stress mitigation begins

Positive impact to the chloroplasts in plant cells leads to improved photosynthesis.

Long term colour sets in

Plant begins to exhibit healthier canopy colour as a result of improved chlorophyll stability.

Benefits continue

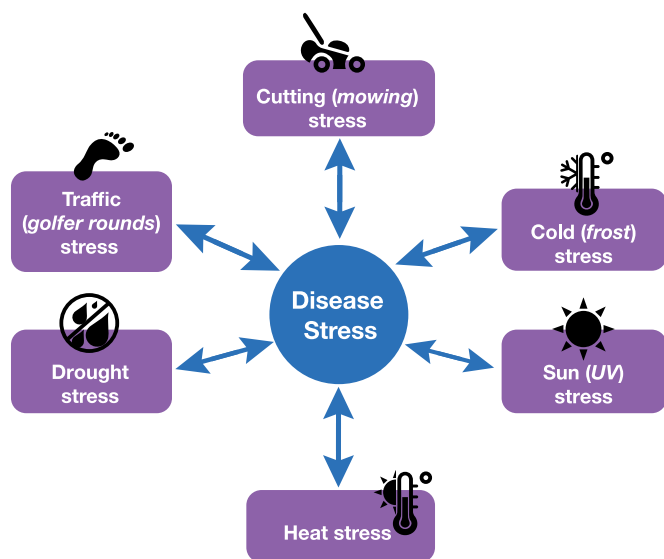

With sustained plant processes leading to improved rooting, better turf density and resiliency.

High performing turf

Turf remains protected and delivers consistency in density, colour and quality.

Your success, our science

Best practice guidelines

- Reserve Stressgard can be used in programs between the application of other mode of action fungicides or tank-mixed with other fungicides to keep up group rotation.
- For most effective disease control good application coverage must be achieved before disease outbreak occurs.
- Reserve Stressgard is a contact and protectant fungicide and does not penetrate inside the turfgrass tissue.
- Reserve Stressgard is a member of the multi-site activity group of fungicides. For fungicide resistance management, this product is a Group M5 fungicide.

Product Profile

Active Ingredient: 720 g/L Chlorothalonil

Chemical Group: Group M5 Fungicide

Formulation: Suspension Concentrate

Pack sizes available: 10 L

Product Safety: When preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and goggles and disposable mist face mask covering mouth and nose. Read the registered product label prior to use.

Regulatory information: All pesticides are regulated in Australia under the Agricultural and Veterinary Chemicals Code Act 1994 to ensure that they do not pose an unacceptable risk to human health and the environment.

For information regarding the pesticide regulatory process please visit the Australian Pesticides and Veterinary Medicines Authority website at www.apvma.gov.au
