Containers close to fire should be removed if only safe to do so. Use water spray to cool fire exposed containers.

Minimise run-off from firefighting entering drains and water courses.

**Special Protective Equipment and Precautions for Fire Fighters:**

When fighting a major fire wear self-contained breathing apparatus and protective equipment.

## Section 6 - Accidental Release Measures

**Personal Precautions, Protective Equipment and Emergency Procedures:**

Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation. Avoid breathing vapours.

Take care as spill may cause a slip hazard.

**Environmental precautions:** In the event of a major spill, prevent spillage from entering drains or water courses.

**Methods and Materials for Containment and Cleaning Up:**

Stop leak if safe to do so and absorb spill with sand, earth, vermiculite or some other absorbent material.

Collect the spilled material and place into suitable container for disposal.

## Section 7 - Handling and Storage

**Precautions for Safe Handling:**

Use of safe work practices are recommended to avoid eye and/or skin contact.

Food, beverages and tobacco products should not be stored or consumed where this material is in use.

Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use. Provide eye wash fountains and safety showers in close proximity to points of potential exposure.

**Conditions for Safe Storage:**

Store in a cool, dry and well-ventilated area. Keep container tightly closed when not in use. Keep away from incompatibilities.

## Section 8 - Exposure Controls and Personal Protection

**Exposure Standards:**

No specific exposure standards are available for this product.

The following Australian Standards will provide general advice regarding safety clothing and equipment:

### SAFETY DATA SHEET

Respiratory equipment: **AS/NZS 1715 and 1716**, Protective Gloves: **AS 2161**, Occupational Protective Clothing: **AS/NZS 4501**, Industrial Eye Protection: **AS/NZS 1337**.

**Engineering Controls:** Natural ventilation should be adequate under conditions of normal use.

**Respirator Protection:**

Respiratory protection is not required under normal use conditions.

Where an inhalation risk exists, wear dust mask or approved particulate respirator (filter type P). At high vapour/mist levels, wear a powered air purifying respirator (PAPR) with P3 filter or an air-line respirator or a full-face P3 (particulate) respirator. See above AS/NZS standards for more information.

**Skin Protection:**

Skin protection is not required under normal use conditions. See above AS/NZS standards for more information.

When selecting gloves for use against certain chemicals, the degradation resistance, permeation rate and permeation breakthrough time should be considered.

Wear protective clothing ensuring all skin areas are covered. Occupational protective clothing (depending on conditions in which it has to be used, in particular as regards the period for which it is worn, which shall be determined on the basis of the seriousness of the risk, the frequency of exposure to the risk, the characteristics of the workstation of each worker and the performance of the protective clothing). See above AS/NZS standards for more information.

**Eye and Face Protection:** Not necessary under normal use conditions. In case of spill or leakage wear eye or face protectors against splashing materials or liquids. See above AS/NZS standards for more information.
