

Technical Information Sheet

Grazon Extra *A multi-active herbicide*

Active ingredients 300g/L triclopyr, 100g/L picloram, 8g/L aminopyralid

Pack size 1L & 5L

GROUP

HERBICIDE

A multi-active herbicide containing triclopyr, picloram and aminopyralid, for the control of a wide range of environmental and noxious and herbaceous weeds.

Grazon Extra has a label registration for a wide range of problem woody weeds in the Australian environment including, but not limited to; eucalypts, gorse, boxthorn, acacia, camphor laurel, prickly pear, groundsel bush, brigalow, privet, rubber vine, paperbark tea tree, lantana and blackberry.

Grazon Extra can be applied through high volume spray equipment, controlled droplet applicators, low volume equipment, knapsack sprayers and by using a cut stump or basal bark application method.

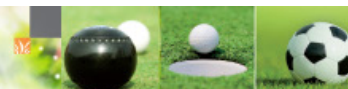

Key benefits of Grazon Extra

- A quality option for foliar spraying of tough-to-kill woody weeds and many noxious herbaceous weeds.
- Acts on both foliage and roots to provide rapid brownout of leaves, dry down of stems and destruction of the root mass to prevent regrowth.
- Leaf brownout and distortion of stem tips will normally be obvious within a week of application.
- Ingredients remain active in the soil and prevent seeds of the target woody plants and secondary weeds from germinating for many months after application (in some cases up to two years).
- Grazon Extra offers control of a broad list of weeds
- Controls the target weeds without harming pasture grasses

Directions for use

Grazon Extra is a member of the pyridines group of herbicides. The product has the disrupters of plant cell growth mode of action. For weed resistance management the product is a group I herbicide. Available in convenient to use 1 and 5 Litre containers
