FUNGICIDE

Colin Campbell (Chemicals) has introduced Liquid Dek a liquid version of our popular Dek Mancozeb fungicide. The liquid version makes for easier use and storage.

Liquid Dek is a contact fungicide. Liquid Dek works by forming a protective barrier around the plant tissue (i.e. chemical barrier between the fungus and the plant). Liquid Dek is recommended to be applied every 7-14 days depending on mowing frequency, play, sunlight, watering and general stress on the plant.

Liquid Dek is registered to control the following diseases (at a rate of 35.5L - 41.5L per hectare):

- Brown Patch (Rhizoctonia)
- Fusarium
- Helminthosporium

Liquid Dek is available in 10L containers

Brown Patch

Black Helmo

Winter Fusarium
