

Midas Turf Fungicide

The new standard in Dollar spot control

Midas Turf Fungicide

- Boscolid Fungicide – 500g/kg WG formulation
 - ▶ SDHI or carboxamide class of chemistry – group 7
 - ▶ Inhibits respiration within the fungal cell
 - ▶ Extremely effective on dollar spot
 - ▶ Low use rates
 - ▶ Preventative and early curative activity
 - ▶ Upward systemic and limited translaminar movement – moves with water stream in plants
 - ▶ 1kg Pack

Product attributes

- Remains in suspension indefinitely
- Will not clog spray nozzles
- No active ingredient lost
- Will re-suspend with agitation
- Remains compatible with excessive hard or soft water
- 500g/kg Water Dispersible Granule
- Dust Free
- Uniform particle size
- Remains compatible with excessive hard or soft water

Proposed Use Rates / Intervals

- 780g / ha
- 14 to 28 Day application interval
- No more than 2 consecutive applications
- Maximum of 4 application / year
- No downwind spray buffer zone

Disease Control

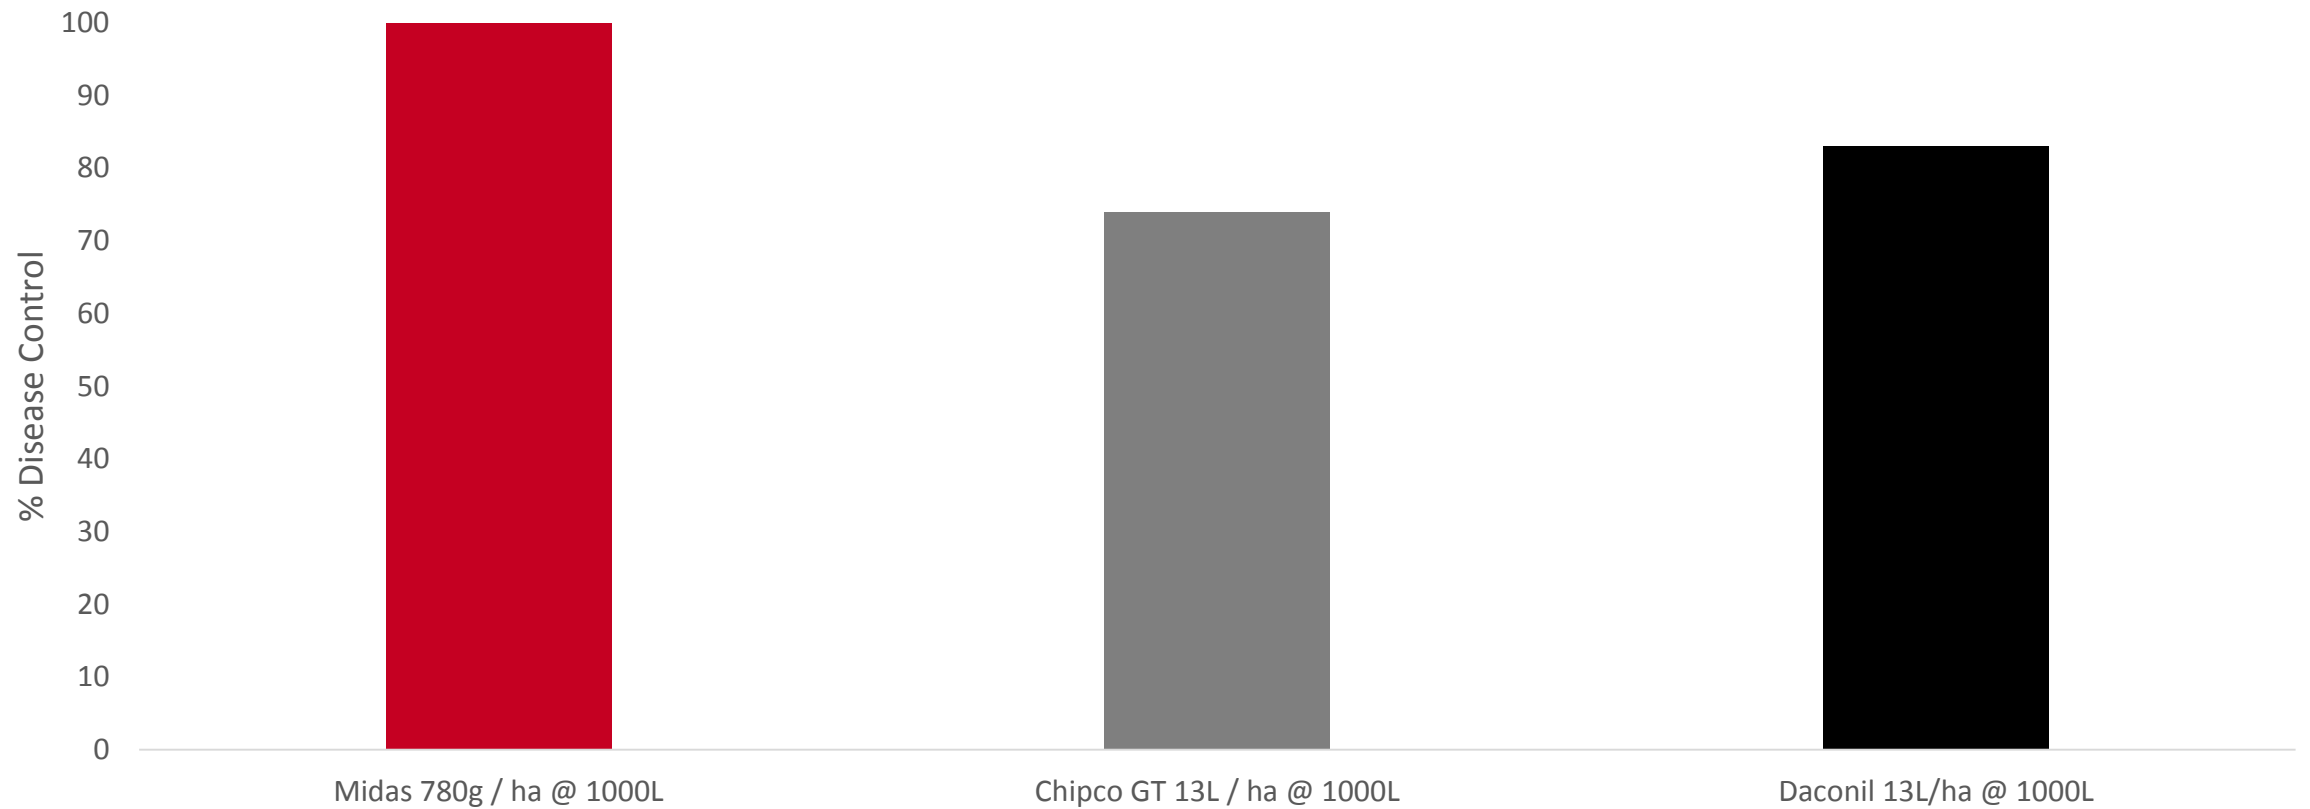

- Effective against strains of dollar spot that are resistant to sterol inhibitors, dicarboximides and benzimidazoles
- Rotate Midas with other effective dollar spot fungicides
- Maximum 2 consecutive applications followed by application of another fungicide
- Excellent for fairway dollar spot where long term control is desired
