Our core segments of business focus include:

- Local Government and Open Spaces Management
- Golf Courses and Lawn Bowls Clubs
- Sporting Stadia, Schools and Amenity Turf
- Spray Contractors and Linear Asset Management
- Racetracks
- Turf Farms
- Landscape Specialists
- Industrial Vegetation Management
- Hydroseeding Specialists
- Aquaculture

About Nuturf

Nuturf, has been a leading manufacturer and distributor of products and agronomic services specialising in the Turf, Landscape and Amenity Horticulture industries for over 50 years. Our national network of qualified sales specialists and consultants offer advice and solutions in Plant Nutrition, Plant Protection, Seed, Surfactants and Colourants. Between them the Nuturf sales team share over 200 years of experience servicing the Australian turf and associated industries, with some current tenures stretching over 30 years.

Nuturf possesses manufacturing capabilities at various sites throughout the country where we develop, manufacture and distribute Australian made products designed for local conditions. In addition to servicing the national market, Nuturf also export a range of quality Australian products to international clients in Asia, Europe and the Pacific.

As a company Nuturf has played an integral role in the development of the Australian turf industry, partnering with international developers to introduce world leading technologies into the Australian Turf and Amenity Horticultural Industry. Nuturf has had a proud history of being the innovators of new technologies. Our internal Research and Development Division in collaboration with our technically driven sales team labour to identify key industry needs, delivering solutions through the development of new products, services and ongoing technical support.

Agronomy Services Division

Nuturf's Agronomy Services Division has been an integral component of Nuturf's professional service offering for well over a decade. Through the Agronomy Services Division, Nuturf aims to provide the turf industry with a complete technical solution package for any situation, and to facilitate better industry understanding of agronomic and plant protection issues.

The Agronomy Services Division provides the Australian Turf Industry with a range of analytical and diagnostic tools allowing

Turf Managers to make accurate and informed decisions. One of the key focuses of Nuturf's Agronomic Services is the emphasis on agronomic efficiency through quantifying exact turf requirements and eliminating excessive, unnecessary inputs.

Analytical Services

Over the years Nuturf has continued to strengthen its' Analytical Services range. Supported by the Getresults system (www.nuturf.getresults.nu) – Australia's longest running and most comprehensive online turf management platform – Nuturf has consistently provided solutions to difficult agronomic problems through our premium Soil, Tissue and Water analysis. The Getresults system is the cornerstone of Nuturf's technically driven approach, providing Turf Managers with a single access point to past and present soil, water and tissue analysis data that can be compared, contrasted and graphed according to specific requirements.

Diagnostic Services

Nuturf's Diagnostic Services offering has grown and diversified to include industry firsts such as Root Health Assessments, Chemchek Pesticide Water Analysis, and Soil Microbial Health Assessments. The continued improvement on traditional services such as Disease Diagnosis and Nematode Extractions has consistently kept Nuturf at the forefront of agronomic services in the Australian turf industry. The Agronomy Services Division also undertakes a range of consultancy work in the Local Government segment of the Australian Turf Market by providing comprehensive sportsfield safety assessment audits and maintenance programming assistance. This service is aimed at optimising turf quality, safety of use and cost efficiency in the long term. Nuturf also conducts environmental consultancy work, undertaking noxious weed surveys, algae identification, and environmental water, and soil assessments.

To provide a consistent and accurate service, Nuturf has alliances with Australia's leading laboratories in the field of Nutrition, Soil Physical Analysis and Plant Protection. Furthermore, Nuturf consultants are highly qualified professionals who possess experience in turf management, pest management, soil and water science.

Folimax Liquid Fertiliser Range

Product	Analysis						Rate/ha	Pack Size
	Key Technology	Nitrogen %	Phosphorus %	Potassium %	Sulphur %	Trace Elements

QUALIBRA[®] Soil Wetting Agent: Derived from deeper science

A powerful curative and lasting preventative
wetting agent that:

- is a 100% blend of proprietary non-ionic surfactants; with no water added
- maintains firmer surfaces
- encourages healthier, deeper root mass
- recovers turf faster from periods of stress
- increases water availability
- reduces plant stress
- reduces effects of drought conditions
- prevents dry patch occurring
- improves turf colour and quality

synagro[®]

Black label

NUTRITION RANGE

PREMIUM GRANULAR NUTRITION FOR AUSTRALIAN TURF MANAGERS

The Black Label range of professional granular fertilisers has been developed to accommodate the needs of turf managers in every turf maintenance scenario. Refined over many years, Nuturf's Black Label range has continuously evolved to harness the latest turf nutrition technologies available including multiple forms of controlled and slow-release nitrogen for any situation.

With three uniquely different ranges available, from Black Label, to Black Label Pro, and Black Label Pro+, the consolidated portfolio contains an array of individual formulations with a raft of features including:

- **PROUDLY AUSTRALIAN MADE FOR LOCAL CONDITIONS**
- **MULTIPLE FORMS OF NITROGEN**
- **MULTIPLE FORMS OF POTASSIUM**
- **VARYING GRANULE SIZES FOR ANY SPORTSTURF APPLICATION**
- **ADDED MINOR ELEMENTS FOR PLANT HEALTH BENEFITS**
- **MULTIPLE FORMULATIONS TO SUIT YOUR SITUATION**

The Black label Pro+ products mini prill blends are the flagship premium products of the Black Label family, developed for use in high pressure sportsturf situations where perfection is the standard.

- Coated potassium nitrate for 2-4 month controlled release
- Sustained and uniform growth response for up to 18 weeks
- Contains both MU and PSCU nitrogen release technologies
- Added iron for immediate deep greening
- Consistent 150SGN mini prill for even distribution and reduced surface disruption

The Black Label Pro products are a collection of sportsturf blends leveraging PSCU for a sustained growth response. These tried and tested analyses have formed the backbone of turf management programs for many years and are now available in a smaller prill size.

- A variety of tried and tested NPK analyses for any situation
- Contains PSCU for controlled nitrogen release
- Added iron for immediate deep greening
- Premium 200-230SGN prill size for optimised distribution

The Black Label fertilisers are highly economical, ever predictable and proven options that meet a whole suite of needs in a logical manner. This group of products seeks to address all the fundamental requirements of turfgrass management. No fuss – just effective.

- Well-rounded no fuss formulations
- Varying nitrogen release technologies
- A broad array of controlled release options
- Standard 300-350SGN for high-cut turf situations

Biostimulants and Bioamendments

Product	Analysis	Key Use	Rate/ha	Pack Size
Auxinone Growth Stimulant	0.075g/L NAA, 0.075g/L IAA	Hormonal rooting stimulant for turf and ornamentals	10L	10L
BioMAX Fortify	Trichoderma viride 10 cfu/g	Turf Bio-Inoculant and growth stimulant	400-800g	100g
FoliMAX Amino +	Amino acids, vitamin B1, fructose & growth promoters	Plant stress resistance	10-20L	20L, 200L
FoliMAX Humic +	20% humic acid	Soil conditioner	10-20L	20L, 200L
FoliMAX KelMAX	100% concentrated ecklonia maxima seaweed	Root builder	5-20L	20L, 200L
FoliMAX Kelp +	Kelp enhanced technology	Enhance root development	10-50L	20L, 200L, 1000L
FoliMAX Soil Prima	Carbon, humic and fulvic acids and polyelectrolytes	Soil conditioner	20-40L	5L
Noculate Liquid	Beneficial micro-organisms, vitamins, humic acid and kelp	Soil conditioner and enhanced root development	5-20L	10L

Plant Growth Regulators

Product	Analysis	Use	Rate/ha	Pack Size
Ethic 480 Turfgrass Growth Regulator	480g/L Etephon	For the suppression of Poa annua seedhead	4-8L	20L
Pac - Down Plant Growth Regulator	250g/L Paclobutrazol	Winter Grass (poa) suppression	1.6 – 2.24L / Ha	1L
Primo 250 EC Turf Growth Stimulator	250g/L Trinexapac Ethyl	Turf growth regulator for broadacre usage	0.2-4L	5L
Primo MAXX Turf Growth Regulator	120g/L Trinexapac Ethyl	Premium formulation turf growth regulator	0.4-8L	5L
Quali-Pro Marvel 175EC Plant Growth Regulator	175g/L Trinexapac Ethyl	For the reduction of stem and leaf growth	0.4-5.5L	5L
Quali-Pro Marvel Ultra	120g/L Trinexapac Ethyl	Regulation of leaf and stem growth	0.6-8L	1L, 5L
Trimmit Growth Regulator	250g/L Paclobutrazol	For the control of growth in ornamental plants	0.5-2.5mL plant	1L

MAKING LIGHT WORK

RYDER® Turf Pigment gives your turf a deep natural green colour with flexibility to manage the colour intensity to suit your turf situation and needs

Ryder UV Filter

Adjuvants and Colourants

Product	Components	Rate 100L water or as indicated	Pack Size
ADJUVANTS			
Buffer 700	350g/L Soyal phospholipids, 350g/L Propionic acid	100-500mL/100L	5L
Driftex	790g/L refined canola oil	70-150mL	5L
Encase Anti-transpirant	904.32 g/L Cyclohexae polymer	6-10mL 100m ² / 100-150mL water	10L
Exifoam	Polydimethylsiloxane and dispersing agents	800g	25kg
Foam Marker White	289 g/L Sodium alkyl ether sulphate 41 g/L Lauryl alcohol	250mL-1L	10L
Hasten	704g/L Ethyl and Methyl Esters and 196g/L Non-ionic surfactants	200mL-4L	20L
Nemo Aquatic Surfactant	315 g/L Cocamidopropyl betaine	50-300ml	10L
Pulse Penetrant	1020 g/L Polyether modified polysiloxane	30-200ml	5L
Spray Grade Ammonium Sulphate	980g/kg Ammonium sulphate	800g	25kg
Umbrella 905 Non-ionic Sticker Spreader	905 g/L di-1-p-Menthene	200-300ml/ha	5L, 20L
Wetter Pro Surfactant & Penetrant	1020 g/L Polyether modified polysiloxane	30-200ml	5L
Wetter 1000 Wetting & Spreading Agent	1000g/L Alkoxyated alcohol	40-400ml	20L
COLOURANTS			
Big Foot Blue Turf Colourant	93 g/L Sulphonated aromatic acid dye	100-150ml	5L, 20L
Big Red Spray Marker Dye & Foam	150g/L Rhodamine B	50-100ml	5L
Foursome Pigment	Alcohols, C12-13, ethoxylated 2-ethyl hexanol	1.1-1.5L/ha	3.7L
Green Lawnger Turf Paint	Blend of pigments	see label	10L
Ryder Turf Pigment	Various alcohols C12-15, fatty acids, diesters and polyglycol	0.75-2L/ha	1L

Wetting Agents

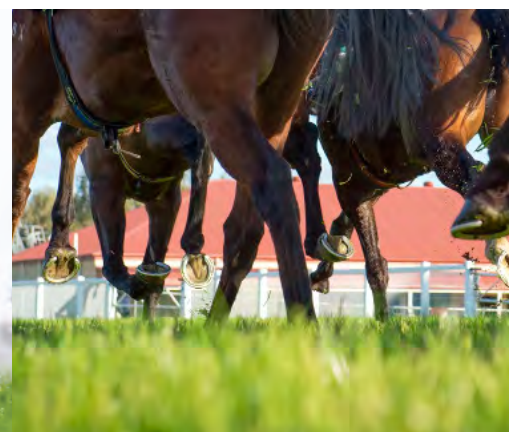

Product	Function / Use											Rate/ha	Pack Size
	Improves turf colour and quality	Prevents water repellency	Rapid recovery from dry patch	Reduces turf wilt and stress	Promotes turf uniformity	Reduces water usage	Assists in penetration	Reduce runoff	Improves root zone porosity	Dew retardant	Injection
