DIRECTIONS FOR USE

RECOMMENDED RATE: 3.0 kg/100m² (0.25 kg N) or 300 kg per hectare (25 kg N). For use on high cut turf areas (greater than 12mm). Do not use on putting greens, low cut tees or bowling greens. Designated for initial green-up (aided by readily available iron), uniform growth, and sustained nitrogen release. Apply to dry foliage and water soon after applications with 6mm of water.

SPREADER SETTINGS:

These are approximate settings, which may need adjustment depending on walking speed. It will be necessary to calibrate spreaders before use.

Rotary Spreaders	300 kg/Ha
LESCO Calibration Gauge Settings	#24
Scotts® R-8A	K

Use only with rotary spreaders.

STORAGE & USE: Store in a clean, dry place and use only clean, dry spreaders. Sweep or blow the fertiliser off paved surfaces following application to avoid discolouration. Do not leave unused product in spreaders.
