STAMINA® RELIEVE

TREATS COMPACTION, CRUSTING & POOR DRAINAGE

DIRECTIONS FOR USE & APPLICATION RATES

Situation	Rate	Rate/Ha	Comments
Sportsfields, golf courses, bowling greens, parks, race tracks, freeway verges and lawns.	10mL/100m ²	1 L	Stamina Relieve can be applied anytime. When mixing, pour the required amount of Stamina Relieve into the spray tank. If excessive foaming occurs, use a defoaming agent. The amount of water to be mixed with Stamina Relieve will vary with the type of spraying equipment used. The turf should be moist at the time of application. Irrigation or rainfall soon after treatment will wash Stamina Relieve down into the soil profile and ensure good soil contact. For best results apply Stamina Relieve a minimum of twice annually, with the exception of heavy traffic turf such as: bowling greens, golf greens and tees, race track or sportsturf, etc., where several applications are recommended at monthly intervals. Stamina Relieve is not recommended for the treatment of hydrophobic soils or sodic soils (salt degraded) in isolation.

TANK MIX FLEXIBILITY

When Stamina Relieve is mixed with liquid fertilisers, it can assist those fertilisers (particularly organic) to quickly reach the root zone. Stamina Relieve is compatible with most liquid fertilisers; insecticides; fungicides, and preemergent herbicides. When tank mixing with other chemicals, then ensure Stamina Relieve is added last. If excessive foaming occurs, use a defoaming agent. Do not mix Stamina Relieve with chemicals that are known to be injurious to the seedling before emergence, or post emergence (selective) herbicides. A compatibility test should be carried out before mixing in the bulk spray vat.

STORAGE AND DISPOSAL

Stamina Relieve is Biodegradable, Non-Flammable and Non-Corrosive. Store in original container in a well ventilated area. Dispose of empty container in accordance with local law. Never leave the cap off a full or partly used container.

SAFETY DIRECTIONS

Avoid contact with skin and eyes. Wear overalls, rubber gloves, goggles or disposable face shield. After each day's use wash contaminated clothing, gloves and face shield.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. If swallowed, DO NOT induce vomiting. Give a glass of water. Additional information is listed in the Material Safety Data Sheet.
