

Striker Regenerator Ryegrass blend

Turf and lawns

Excellent wear tolerance

Extremely strong
and fast turf

Medium to
dark-green colour

Beautiful leaf texture

Added value trait

Striker Regenerators outstanding wear tolerance, quality, high endophyte gives your fields the best performance for year round wear and tear.

Striker Regenerator has been designed to give end users 'the best of both worlds'. Using revolutionary mobile technology and superior wear tolerance of RPR and combining it with the exceptional turf characteristics of Premier 3 ryegrass.

RPR - Regenerating Perennial Ryegrass is the first perennial ryegrass having the specific characteristic of spreading horizontally via determinate stolons #Strong as Iron. This characteristic makes RPR many times stronger than other types of perennial ryegrass, while also growing at the same rate. And the result is a regenerating perennial ryegrass with the highest wear tolerance that is perfect for use in sports pitches eg. Blundstone Stadium Tasmania

Trialled in Australia, Premier 3 has proven excellent turf performance in independent trials conducted by John Neylan. Premier 3 was #2 performer on combined turf performance statistics, and an improvement over the original Premier II. This variety has high endophyte, deep green colour, very dense tillering and strong disease tolerance.

It is highly recommended for all high end sports use throughout Australia and New Zealand.

Key features

- Excellent wear tolerance!
- Revolutionary perennial ryegrass with stolons!
- Extremely strong and fast turf
- Medium to dark-green colour with beautiful leaf texture
- High endophyte providing excellent disease and insect resistance

Key benefits

- Two of the best Premier 3 and RPR
- This mix allows for heavy wear tolerance and longer hours of use
- Ideally suited for long term sports fields and golf tees with recovery post games
- Less overseeding costs and worn out areas

Composition

Species	%
RPR - Regenerating Perennial Ryegrass <i>(Lolium perenne stoloniferum)</i>	50
Premier 3 ryegrass <i>(Lolium perenne)</i>	50

Striker Regenerator has superior wear tolerance and regeneration compared to other grasses thanks to RPR's unique pseudo-stolons. Combined with Premier 3 ryegrass, this blend has exceptionally high turf quality. With a deep green colour, highest density, and exceptional drought tolerance this blend is in a class of its own.

Uses

- Permanent cool season grounds
- Oversowing warm season bermudagrass fields
- Football/soccer and rugby pitches in Australia and NZ
- Golf tees, fairways and surrounds
- Landscaping and home lawns

Suggested sowing rates

New field: 400–500kg/ha

Oversowing bermudagrass: 250–500kg/ha

*There are some things you just have to see for yourself to believe them.
Stoloniferous perennial ryegrass was a good example of something like that,
but now that I've seen RPR I really am a believer.*

Andy Newell - Head of Turfgrass Biology, STRI
