taskTracker

taskTracker is the ultimate solution for turf managers looking to seamlessly manage their day-to-day operations, all while gathering valuable insights on how money and resources are used so you can streamline your workload.

From automated labour tracking and task assignment to equipment management, course conditions, chemicals, safety, and reporting, taskTracker's fully integrated platform has got you covered

Fast Job Assignments
Assign jobs quickly and easily from the comfort of your office or anywhere that you have Internet.

Effective Communication
From job assignments to mowing directions, and equipment management, your crew will know what to do.

Equipment Management
Assigning & maintaining equipment is a snap with detailed logs of usage, maintenance, parts, & replacement costs.

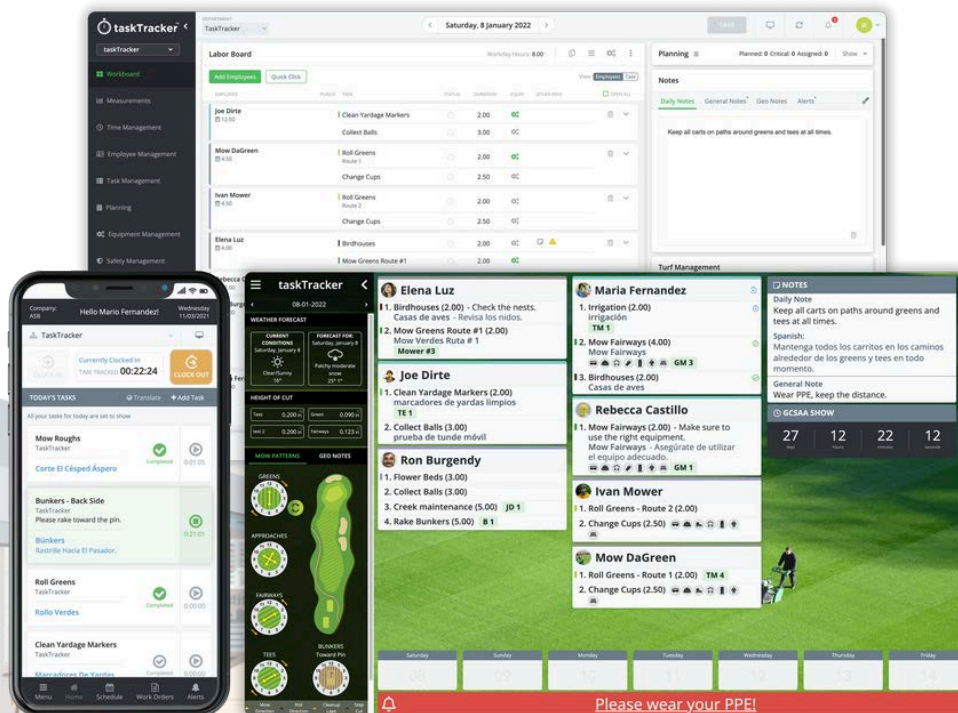

Pocket Productivity
Compatible across multiple devices, from desktops to phones, taskTracker available when you need it.

Detailed Reporting
taskTracker converts your daily data into easy-to-read reports. Back up your budget and justify your expenditures.

Link Outside Data
Integrate other data and programs into taskTracker so that you are always working with the best technology.

System
Uptime

“The ASB taskTracker system fundamentally changed the way we operate at Royal Randwick Racecourse and subsequently, the Australian Turf Club Tracks teams.

I first adopted use of the system in 2019, and in comparing the way things were done previously, it was easy to see how this platform could help our systems.

Royal Randwick holds, at a minimum, 45 race meetings, 30 sets of barrier trials along with 365 days a year training usage. Without the taskTracker platform, my ability to plan and ensure the venue is prepared to meet expected standards would be significantly diminished.

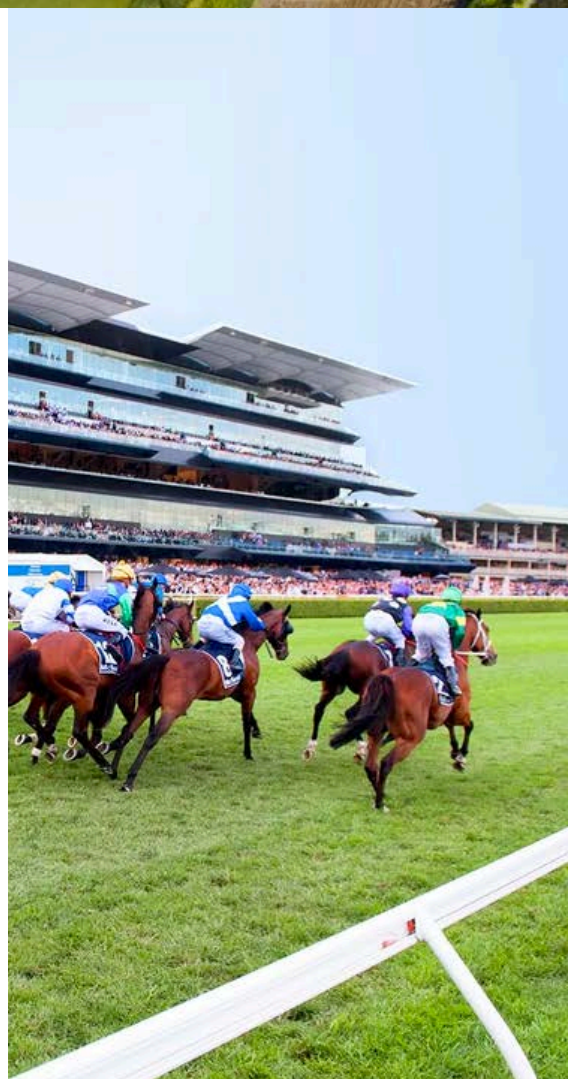

I love the ability to plan ahead whilst also being able to reference previous details on tasks we have performed. It has without doubt created efficiencies across everything we do and the reporting functions enable me to show information in a clear and concise manner.

I have also used this as a development tool for mid-level staff who can edit jobs whilst also allocating, assisting in their time management and being across the events on the day.

If you don't have it yet, you should. ”

Michael Wood,
Racecourse Manager
Royal Randwick & Canterbury Park,
Australian Turf Club
