GENERAL INSTRUCTIONS

Note: A temporary wilting may be evident in crops after application. Under some conditions, regrowth and successive germination of weeds may occur following treatment and may require follow-up spraying.

CROP SAFETY

DO NOT spray outside crop growth stages recommended as crop damage may result.

DO NOT apply to recently released cereal varieties until advice has been sought from Amgrow Specialty Agriculture or the local Department of Agriculture.

MIXING

Add the required amount of product directly to the water in the tank and mix well.

APPLICATION

DO NOT apply by misting machines.

Ground Application: Apply with a properly calibrated boom spray using not less than 50 L water per hectare.

Aerial Application: Apply at least 25 L total spray volume per hectare. The aircraft should fly as low as practical under the prevailing conditions to minimise drift.

RESISTANT WEEDS WARNING

Triple Time Herbicide is a combination of the Nitriles, Phenoxy and Benzoic acid groups of herbicides.

GROUP	6 4	HERBICIDE
--------------	------------	------------------

Triple Time Herbicide has the inhibitors of photo-synthesis at photosystem II and the disruptors of plant cell growth modes of action. For weed resistance management Triple Time Herbicide is both a Group 6 and 4 herbicide. Some naturally occurring weed biotypes resistant to Triple Time Herbicide and other Group 6 and Group 4 herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Triple Time Herbicide or other Group 6 and Group 4 herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Australian Agribusiness (Holdings) Pty Ltd accepts no liability for any losses that may result from the failure of Triple Time Herbicide to control resistant weeds.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

Spray equipment must be calibrated accurately prior to working on crops. All spray equipment must be thoroughly washed out after use and must not be used for spraying horticultural crops.

DO NOT apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures. DO NOT use in close proximity to vines, tomatoes and other susceptible crops including flowers, vegetables, ornamentals, lupins and fruit trees. To prevent damage. DO NOT permit drift or vapour or spray mist to come into contact with fruit and ornamental trees, cotton, vines, vegetables, flowers, tobacco, lupins or any other field crop. Minimise spray drift by using low pressure and nozzles which do not give a fine droplet size.

DO NOT use in high wind.

DO NOT apply this product on or near desirable trees or plants or in locations where the chemical may be washed or moved into contact with their roots.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used container.

STORAGE AND DISPOSAL

This product must be stored in a locked room or place away from children, animals, food, feedstuffs, seed and fertilisers. Store in the closed, original container, in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple rinse containers before disposal.

Add rinsings to spray tank. DO NOT dispose or undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or a designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS

Harmful if absorbed by skin contact or inhaled or swallowed. Will irritate the eyes and skin. Do not inhale vapour or spray mist. Repeated exposure may cause allergic disorders. When opening the container and preparing spray, wear cotton overalls buttoned to the neck and wrist, a washable hat, elbow length PVC gloves and a face shield or goggles. When using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow length PVC gloves. If product on eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use wash gloves, face shield or goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. If swallowed, DO NOT induce vomiting. Give a glass of water.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet (SDS) which can be obtained from the supplier.
