Length with draw bar	104" (264cm)
Width	47" (119cm)
Height	40" (102cm)
Machine weight	500lbs (227kg)
Shipping weight	550lbs (250kg)
Shipping dimensions (LWH)	50" x 50" x 46" (127cm x 127cm x 117cm)

Turbine Blower TB270

Constructed with an Aluminum Cast Turbine Propeller, which is electronically balanced to provide years of trouble-free service. The drive coupling is 100% made out of steel and is backed by a lifetime warranty.

The exclusive muffler design has stronger bracketing and a 1/8 inch larger diameter exhaust manifold to provide stronger, quieter overall operation.

The enclosed turbine air intake provides minimal intrusion of debris in the turbine chamber.

Powered by a Kohler 27HP Pro Command gas engine (2 years warranty)

The weather resistant wireless remote system provides no-delay throttle and chute control at your fingertips.

The fenders are constructed of steel with exclusive impact resistant bumpers to reinforce the overall structure.

The 90° air chute is made of a composite material with an exclusive oblong shape outlet.

The 6 gallon fuel tank allows you to get more done between fill ups.
