MINERAL DEPOSIT CLEANER & IRRIGATION ACIDIFIER

DIRECTIONS FOR USE

IRRIGATION SYSTEM FLUSH

pHantom can be used as a one time system flush for irrigation systems fouled by mineral deposits caused by hard water. Rates vary for each situation so consult your Nuturf Territory Manager or supplier for appropriate dosage for your system.

IRRIGATION WATER TREATMENT

pHantom is suitable to treat water from a variety of sources including bore water, effluent water river and lake water. The required application rate will be determined from irrigation water analysis; however, the usual application rate will range from 100-200L per megalitre of irrigation water. It is recommended that pHantom be dosed through a chemical injection system.

DANGER:

**Causes severe skin burns and eye damage.
May be harmful if swallowed or inhaled.**

For more information contact your Nuturf Territory
Manager on 1800 631 008 or go to our website
