

Technical Information Sheet

Landscape Pro 22-1.5-10

Landscape Pro is a coated controlled release nutrient for use on ornamentals, flowering trees (including Australian natives) and shrubs.

Plants benefit from having an available nutrient source at critical growth periods. With a release pattern that is governed by soil temperature, the plant intercepts available nutrients and they are not lost to leaching or pose a threat to the environment.

Product Features:

- Delivers nutrients for up to 9 months
- Environmentally friendly formulation
- 100% coated controlled release fertiliser
- Delivers water soluble plant nutrients that are encapsulated in a high quality polymeric coating
- Nutrients diffuse slowly and continuously into the root zone
- Nutrient dumping and unwanted growth flushes are reduced
- Nutrient release from the polymeric coating technology in Landscape Pro is determined by soil temperature
- Low level of phosphate is the perfect product for use on phosphate sensitive native plant species
- Potassium source as a sulphate and will not increase soil salt levels

Pack size: 20kg

Product Analysis

Total Nitrogen	22%
as Urea	18%
as Ammonia	4%
Total Phosphorus	1.5%
Total Potassium as sulphate	10%

Directions for use

Situation	Rate	Comments
Trees and shrubs	30-100g per plant	Sprinkle the required amount of product evenly around the plant to be treated.
Hedges, borders and annual plants	Up to 5kg per 100m ² of beds	Do not heap product.
Potted plants	3-5g per L of pot volume	Use high rates for large plants or where high nutrient requirements are evident.
