

Technical Information Sheet

Unizeb 750 DF *Preventative Fungicide*

A dry flowable preventative fungicide formulation for the control of certain fungal diseases in turf.

GROUP

M3

FUNGICIDE

Active ingredients 750g/kg mancozeb

Pack size 20 kg

Key benefits of Unizeb 750 DF

- Economical protection
- An effective resistance management tool when rotated with other mode of action fungicides
- Dry flowable formulation that disperses rapidly
- Can be applied in tank mixes with a wide range of other chemicals and/or fertilisers

Application

Apply sufficient spray volume to wet all leaf surfaces to the point of runoff. The spray equipment should be adjusted so that the spray is evenly distributed, thoroughly covering all plant surfaces.

Directions for use

Partly fill spray tank with water and agitate while adding this product slowly. Continue agitation after filling and during spraying to ensure spray mixture is uniform and to prevent product settling out. For low volume or aerial application prepare a slurry or premix when adding to the spray tank. Additional insecticides, fungicides, surfactants etc should be added after the product is in suspension. Rinse out spray tank pumps and nozzles at the end of the day.

Application Rate Table

Situation	Rate	Comments
Helminthosporium, Fusarium, Rhizoctonia	200-250 g/100m ²	Apply as a protective spray scheduled at 7 day intervals throughout the susceptible season. Use sufficient water to ensure adequate coverage. DO NOT feed grass clippings from treated areas to poultry or animals.
